Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Stefanik (4004388) in view of Ehrlich et al (5622115) or Miller et al (2004/0062934 A1).

Stefanik (4004388) shows a two layered window with epoxy between and is "adapted" to integrally formed into the panel of fiberglass at 25, except the glass panels are made of an acrylic. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the clear panels of Stefanik out of clear fiberglass in view of Ehrlich et al (5622115) or Miller et al (2004/0062934 A1) since these references teach that it is well known to use transparent fiberglass as molded windows.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
